

QAlloy

This document highlights the modifications made to the original Alloy project structure during the development of the quantitative Alloy extension.

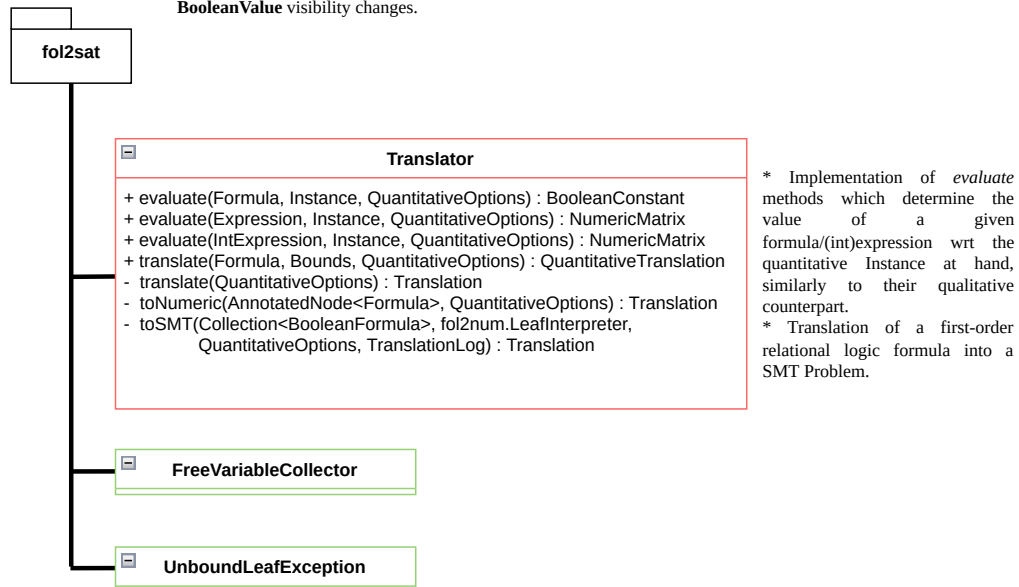

- If a file isn't shown or has a black outline, then it is unmodified.
- New class.
- Minor changes to the class, mainly consisting of:
* removal of the **final** keyword at class level or
* class/constructor/method visibility change.
needed in order to make subclassing/access to the class possible.
- Changes to previously existing classes.

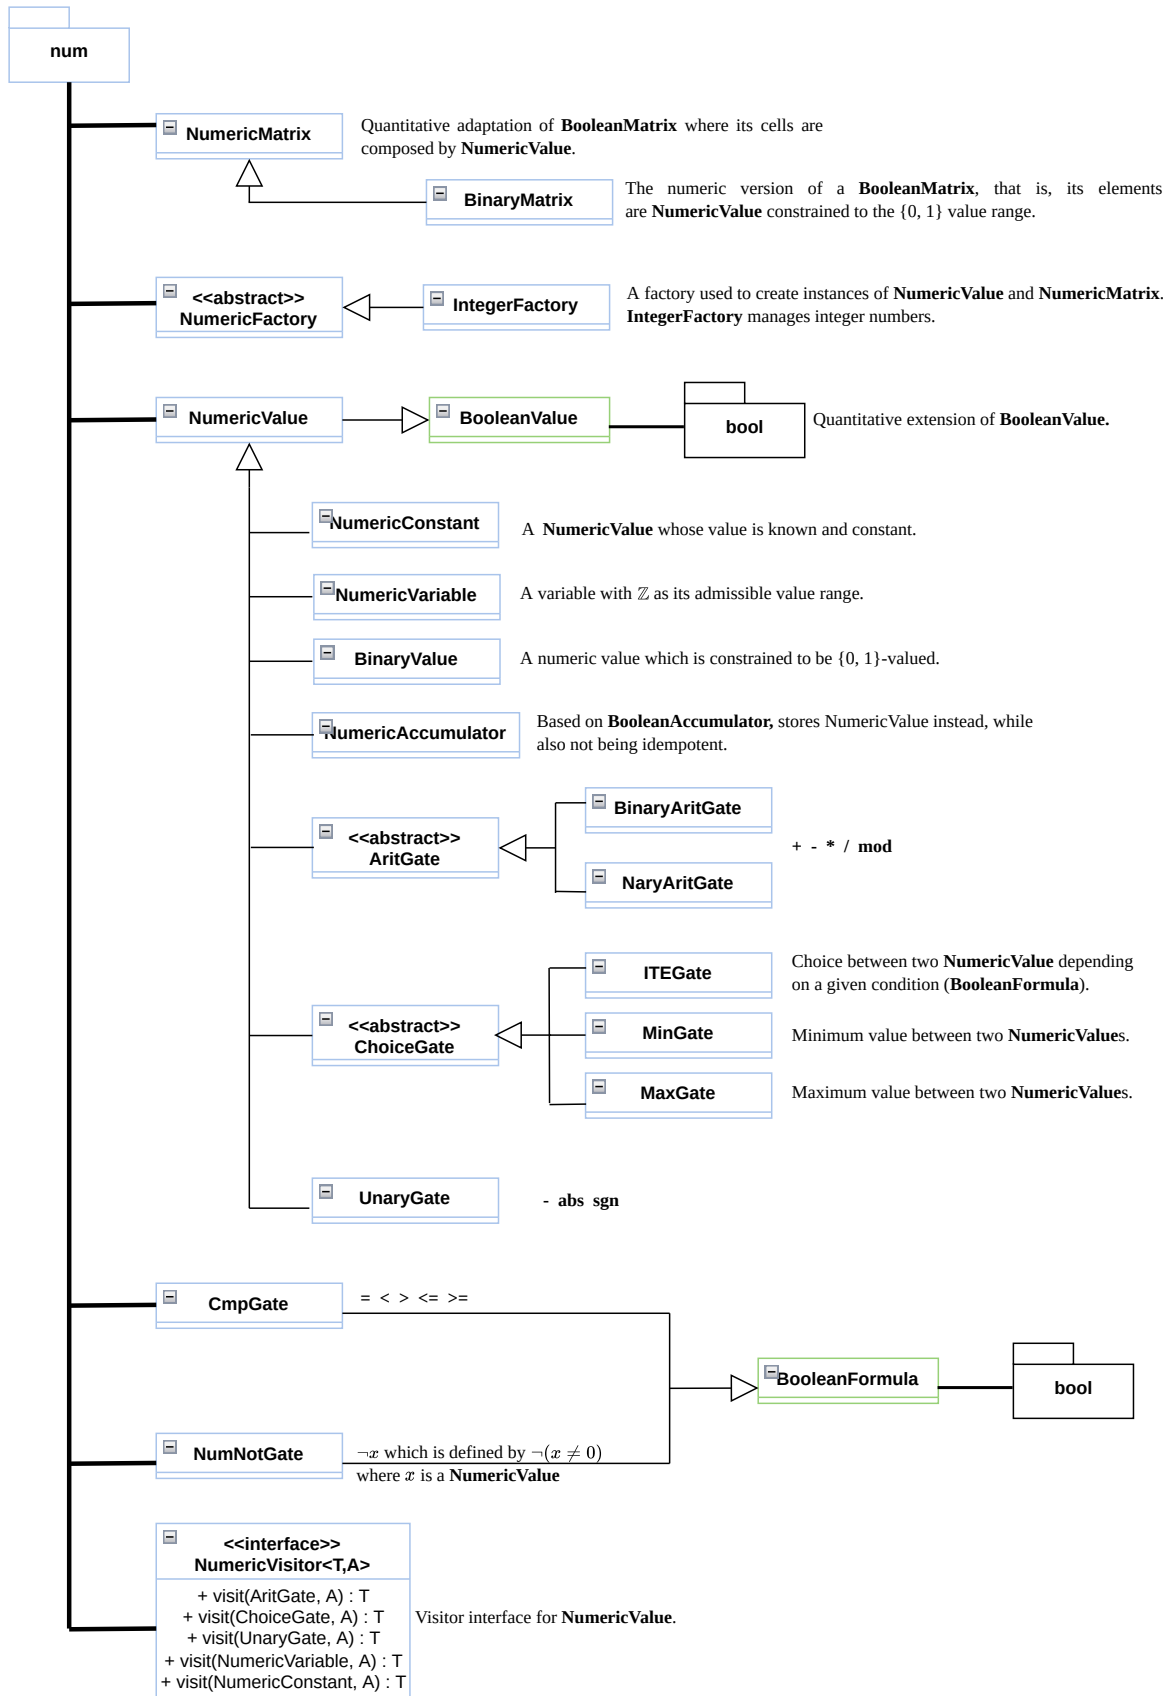

Kodkod

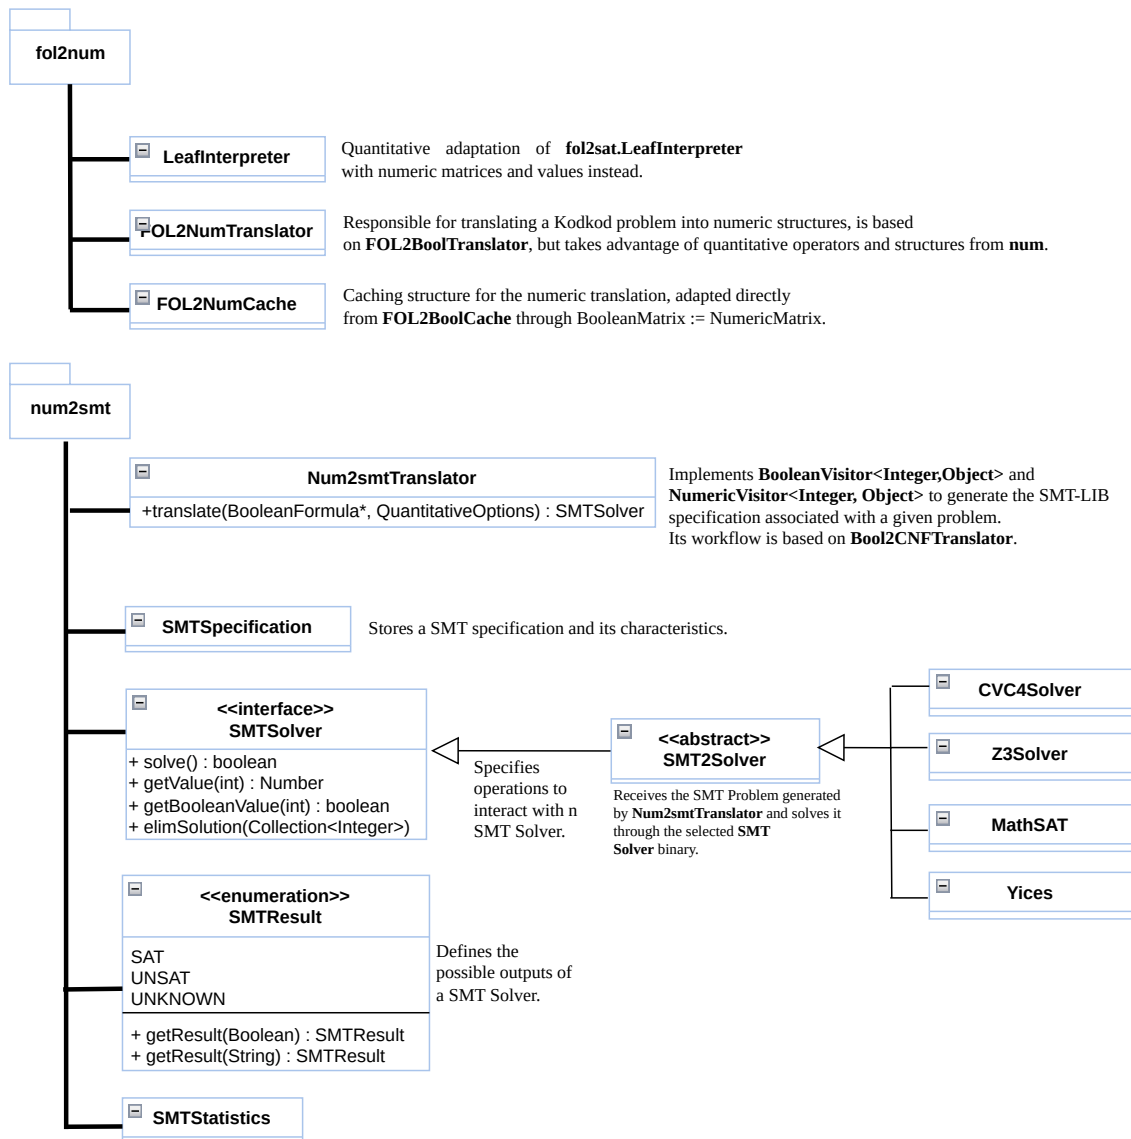

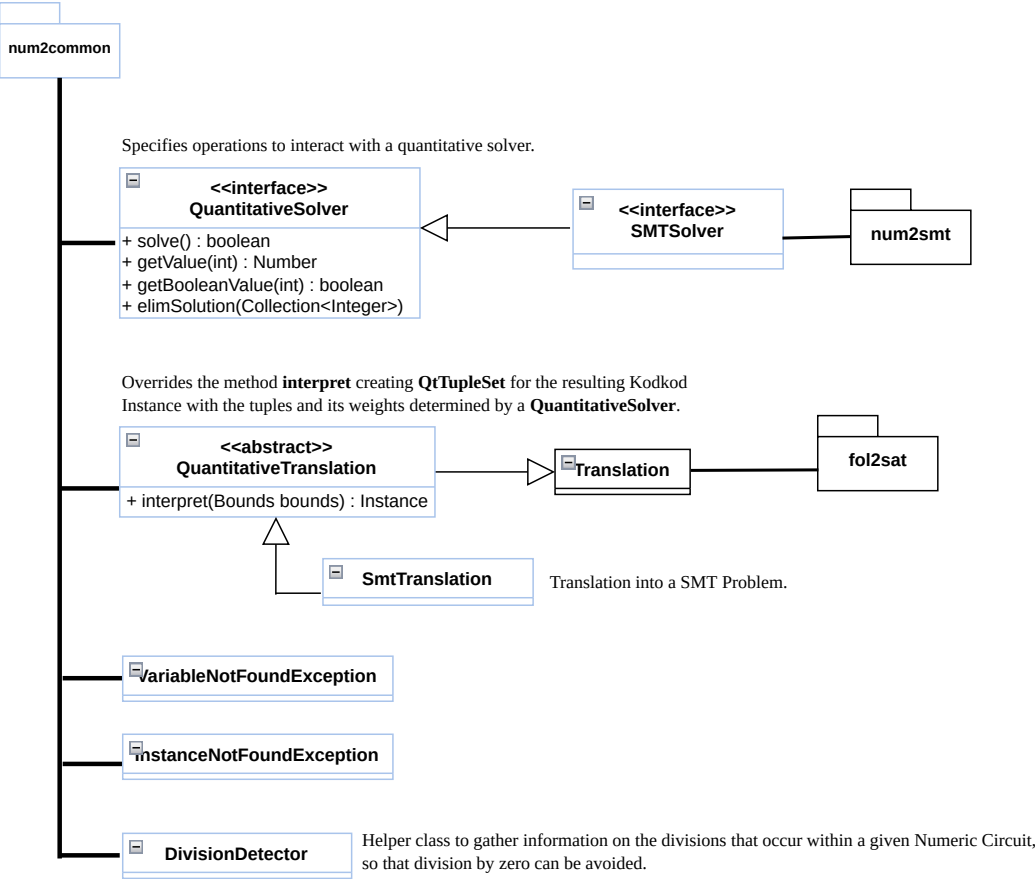

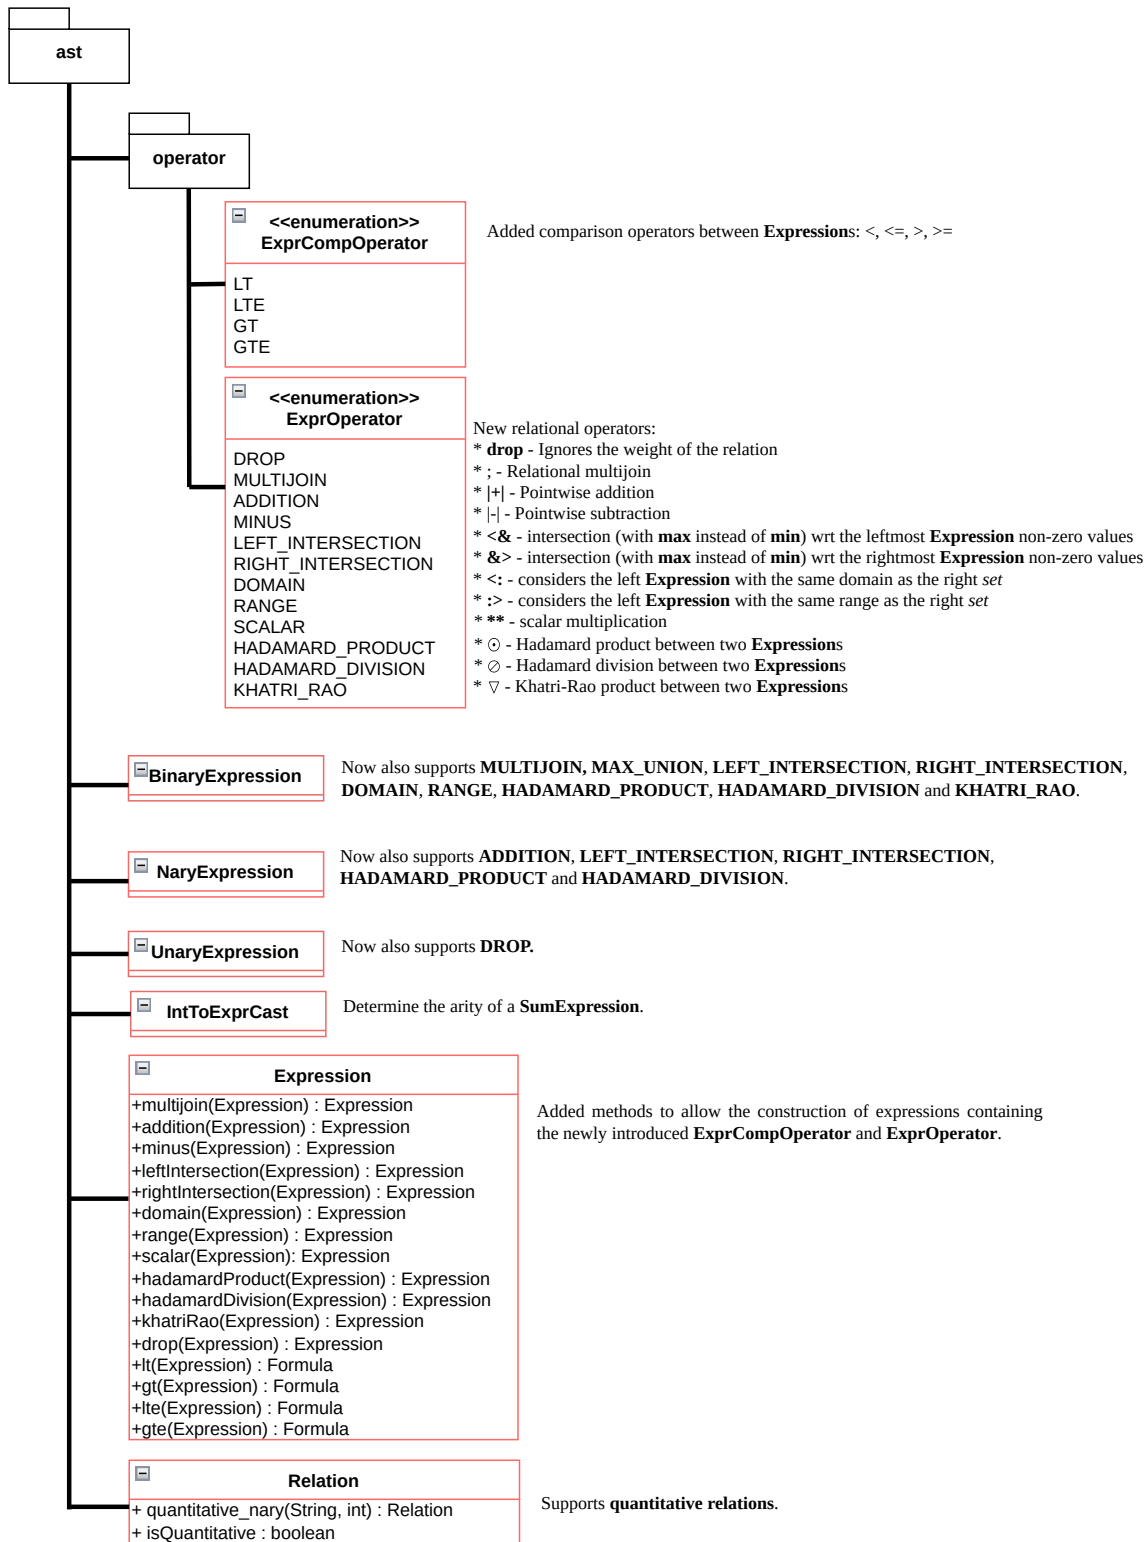

These instances of boolean values had to conform to the **BooleanValue** visibility changes.
